SUMMARY

Full-stack developer building production web apps with React and TypeScript end to end, from component architecture to APIs, authentication, and database design. I integrate AI into real product features, with a growing focus on interactive, motion-rich frontends.

SKILLS

Frontend: React, Next.js, Three.js, TypeScript, JavaScript, Tailwind CSS, Vite, React Query, HTML, CSS
Backend: Node.js, Express, Python, Flask, PostgreSQL, MySQL, Supabase, REST APIs
Tools: Git, GitHub, Figma, Postman, Adobe Photoshop, Odoo ERP
Languages: Arabic (Native), English (Professional)

PROJECTS

4-Shots — Online Ordering Mobile-Web | Freelance | [4-Shots - Mockup]

- Designed and built a custom pickup and dine-in ordering website for a local Egyptian coffee shop, replacing reliance on third-party ordering apps.
- Created a fully branded UI, including custom icons and themes that match the shop's look, so the site feels like the brand rather than a generic ordering template.
- Implemented menu browsing, cart and checkout with a (PostgreSQL) backend for menu, orders and order items.
- Built a staff admin view to receive incoming orders and mark them as preparing or ready.

SANAD — Graduation Project — [SANAD WEB]

- Built a full-stack home-services booking platform connecting Egyptian families with vetted domestic service providers; owned the product end to end from database schema to deployment.
- Developed the entire frontend in React + TypeScript: booking flows, admin dashboard, user profiles, and Arabic/English internationalization (i18n) with full RTL support.
- Designed the Supabase backend — database schema, authentication, real-time features, and row-level security (RLS) policies.
- Integrated the Claude Vision API for OCR document scanning (national ID, driver's license, vehicle license, criminal record clearance) with automated Arabic-to-English field extraction.
- Deployed to Vercel with SPA routing, environment-variable configuration, and a custom domain.

Stack: React, TypeScript, Vite, Tailwind CSS, Flutter, Kotlin, Supabase, Claude API, Vercel

Violtex — Sportswear Factory Website | Freelance [Violtex]

- Building an informational landing page for a sportswear manufacturer, focused on branded animations that communicate its manufacturing identity.
- Designing a brand-driven landing page for a sportswear manufacturer, built around Violtex's black-and-white logo identity (the V, swoosh and lightning bolt) to convey the factory's manufacturing character.
- Designed a scroll-driven portal hero in React/Next.js, where the "O" of the logo expands to reveal the site.
- Packaged animations as standalone, reusable JavaScript modules for clean integration.

EXPERIENCE

Talent Management Specialist – Somabay — Oct 2026 – Present

- Designed a monthly recruitment KPI scorecard (time to fill, hiring-manager satisfaction, candidate experience, quality of hire, process compliance) and introduced weekly reviews with hiring managers to drive accountability.
- Supported the promotion cycle by processing promotion data for 94 employees against the company's job-level structure.
- Driving capability building by linking LinkedIn Learning paths to the performance appraisal as development and next-role-readiness goals; also conduct competency-based interviews and headhunt candidates for open roles.

HR – OD, Learning & Development Trainee – Somabay — July – Sep 2026 · 3 mos

- Conceived a concept for the program, developed it into a visual mood board and coordinated the shoot. The content was published on the company's social media.
- Launched Somabay's LinkedIn Learning partnership: wrote the employee communication email, created the orientation and presentation, and personally briefed employees on how to use the platform and how it helps them, so that every account was activated.
- Owned employee communications and follow-up for the annual engagement survey (run by a third-party vendor), driving 87% participation among ~400 white-collar employees.
- Managed a sales team training with Salah Abu El Magd and evaluated its effectiveness, presenting recommendations to the trainer, the HR team and the Executives.
- Built a web tool that generates employee birthday cards, replacing a manual monthly process for the HR team.
- Evaluated Somabay's internship program of 100 interns and did the executive summary for the Executives.

IT Trainee — Somabay — Aug – Sep 2025 · 1 mo

- Designed and built a full-stack HR Handbook web application (HTML/CSS, Node.js, Flask, JSON) with secure login, HR resources, and team sections to streamline employee and guest access to information.
- Configured internal network infrastructure — cabling, device setup, and access-control segmentation for differentiated departmental access.
- Used Git and GitHub for version control and collaborative development.

Egyptian Exchange (EGX) Training Program — July 2025 · 2 wks

Stage Manager — Evexia, Techne Summit Cairo — May 2024 · 2 wks

- Managed live stage operations for one of Egypt's largest tech conferences, coordinating sessions and speaker logistics in real time.

EDUCATION

Arab Academy for Science, Technology & Maritime Transport — Oct 2022 – 2026

B.Sc. Business Information Systems — Faculty of Business Administration and Technology, Cairo

CERTIFICATIONS & TRAINING

- **The Complete Full-Stack Web Development Bootcamp** — Udemy, 62 hrs (2026)
- **Egyptian Exchange (EGX) Training Program** — hands-on training in stock-market operations and procedures (Jul 2025).
- **Python Programming** — Udemy.
